# 2024第二届航空应急救援年会 及第8届民用直升机产业国际论坛

The 2<sup>nd</sup> Aviation Emergency Rescue Annual Conference 2024  
(held in conjunction with) 8<sup>th</sup> Annual Civil Helicopter Industry International Forum

## Overview

China is vigorously promoting the construction of the aviation emergency rescue system based on the needs of the task of "all kinds of disasters and great emergencies". The aviation emergency rescue force has been significantly enhanced, the linkage mechanism has been continuously improved, the support conditions have gradually improved, and the rescue results have become more and more remarkable, China has basically formed an aviation emergency rescue system combining the national aviation force and the civil aviation force.

On August 22nd-23rd, The 2nd Aviation Emergency Rescue Annual Conference 2024 (held in conjunction with) 8th Annual Civil Helicopter Industry International Forum was successfully held in Xiangyang City, Hubei Province. The conference was hosted by Emergency Rescue Branch, CSAA, Hubei Society of Aeronautics, Shanghai Society of Aeronautics., supported by Chinese Society of Aeronautics and Astronautics, Hubei Association for Science & Technology, organized by Beihang University, AVIC Aerospace Life-support Industries, Ltd., Galleon (Shanghai) Media Co., Ltd.

The conference lasted for two days, focusing on the theme of "Multi-party Cooperation to Promote Aviation Emergency Rescue Industry-University-Research Deep Integration". A total of 24 keynote speeches were delivered, accompanied by 1 panel discussion, attracting the participation of more than 30 enterprises, and nearly 300 representatives from emergency-related agencies and bureaus, various emergency rescue centers, host factories, aviation schools, general aviation units, technical vendors participated in the meeting to promote the development of aviation emergency rescue industry.

Participants said that through this event, they further understood the current hot spots of aviation emergency rescue industry, met new partners and found new business opportunities. We hope to add to the development of China's aviation emergency rescue industry by building a platform for technical exchanges, strengthening the interaction between buyers and suppliers, actively solving the problems in the development of the industry through the collision of ideas, and helping the industry to develop steadily.
